PROFESSIONAL SUMMARY

Self-motivated and enthusiastic frontend developer with hands-on experience designing appealing user experiences. Proficient in the latest technologies and frameworks, committed to creating visually attractive and responsive websites. I am eager to offer my skills and experience to a vibrant firm devoted to continual skill development via mentoring and difficult initiatives.

WORK EXPERIENCE

Frontend Developer

KOYI

October 2024 – present

- Collaborated with a team of developers to build a comprehensive online learning platform, enabling users to access courses, hire professionals, and engage with instructors through a messaging system.
- Designed and developed user-friendly UI components for course listings, professional profiles, and messaging interfaces, ensuring seamless navigation and interaction for learners and instructors.
- Integrated key functionalities including course loading, real-time messaging, and user profile management, enhancing the platform's interactivity and accessibility.
- Optimized UI for responsiveness, ensuring the platform was fully accessible across multiple devices, improving the learning experience for users on both mobile and desktop.
- Worked on the overall design consistency, implementing clean and modern design elements that aligned with the platform's goals of providing a professional, engaging online learning environment.

Frontend Developer

OnionPay

September 2023 – December 2023

- Collaborated in the development of a user-friendly digital payment platform, focusing on enhancing the UI for seamless user interactions

- Designed and implemented UI components for key features such as payment links, receipt generation, and transaction management, ensuring a smooth experience.
- Optimized the dashboard layout, providing an intuitive interface for users to track payments and manage revenue efficiently.
- Worked on improving user accessibility, integrating responsive design elements for mobile and desktop platforms.
- Contributed to the visual design, maintaining a consistent and engaging aesthetic across the app, improving the overall user experience.

Frontend Developer

Megawins
September 2024 – March 2025

- Led UI/UX design for a secure, community-focused gaming and transaction platform, ensuring a seamless user experience across multiple devices.
- Developed key web components for gaming functionalities, including game history tracking, secure payment systems, and dynamic user profiles.
- Collaborated with backend teams to integrate secure payment processing and multi-factor authentication, ensuring data integrity and user security.
- Optimized platform scalability using Tailwind CSS and modular UI elements, ensuring peak performance during high-traffic events.
- Streamlined user interactions by designing intuitive navigation and dynamic feedback systems, boosting engagement and retention.

Mobile Developer

LukeHealth
November 2024 – present

- Collaborated with a development team to create LukeHealth, a medical app designed for users to create personalized profiles, book appointments, and store essential health information.
- Designed and implemented user interfaces for profile creation, appointment scheduling, and health tracking, enabling users to manage their medical needs seamlessly.
- Integrated features allowing doctors to monitor patient health, including prescription tracking, dosage management, and real-time updates on patient progress.
- Developed secure data storage systems to ensure sensitive health information is safely stored and easily accessible for doctors during check-ups and consultations.
- Optimized the app's usability, focusing on creating an intuitive flow for both patients and healthcare providers to enhance the overall user experience, improving patient care and ease of access to medical services.

Frontend Developer

GreenLeaf
June 2023 – September 2023

- Built a responsive website for an organization to enhance their online presence and improve user engagement.
- Designed custom UI components, ensuring a seamless user experience across devices.
- Optimized website performance and integrated third-party APIs for additional functionality.
- Conducted rigorous testing to ensure compatibility, security, and scalability.

Frontend Developer

MOA Delivery
February 2023 – May 2023

- Developed a modern, user-friendly website for a food delivery franchise, featuring an intuitive ordering process and real-time tracking.
- Implemented UI components aligned with the brand's identity, enhancing user retention.
- Integrated API endpoints for dynamic menu updates, order placement, and user notifications.
- Focused on responsive design and performance optimization to ensure a seamless experience for users on both mobile and desktop platforms.

Frontend Developer

EEC
February 2024 – June 2024

- Collaborated with a team to develop an e-powered estate website.
- I integrated endpoints and put logic from the Swagger documentation into practice.
- I created visually beautiful and cohesive user interface (UI) components that improve the development process and user experience.
- I optimized web pages for maximum speed and scalability.

Frontend Developer

MarcheSolution
September 2023 – December 2023

- Collaborated with a frontend team to develop a large-scale school management platform with custom system integrations, some of which are student progress, analysis, ID card & certificate generation, and online exam creation.
- Designed and implemented multiple components to enhance the efficiency and standardization of the user interface system.
- Ensured code quality and standard to ensure a clean and scalable codebase.
- Integrated endpoints using proper documentation with Swager.

Frontend Developer

OneWallet MFB
January 2023 – October 2023

- Collaborated with a team to develop a secure, community-based digital payment platform aimed at revolutionizing local markets in Africa.

- Designed and implemented user-centric UI components for the OneWallet website to enhance user experience and accessibility.
- Integrated endpoints and developed robust functionalities for key features such as tailored rewards, secure payment systems, and identity verification.
- Optimized web pages for scalability and multi-factor authentication.

SKILLS

Web Development: React, NextJs, HTML/CSS

Languages: Javascript, Typescript, Python,

Database: Firestore, Firebase RTDB, Mongodb

Favourite UI Framework: Shadcn UI, Tailwind CSS

EDUCATION

BEng Electrical Electronics Engineering

Air Force Institute of Technology

January 2020 – October 2024 | mando, Kaduna State
